Replicating the analysis from “Alie(n)ation: Political Outsiders in the 2016 U.S. Presidential Election”

As noted above, there are four scripts in this repository: `Alienation-Source.R`, `Alienation-Descriptives.R`, `Alienation-STM.R`, and `Alienation-VoteModels.R`. Running these scripts in their entirety will produce all of the empirical results found in the paper and the online appendix. A short description of each script is provided below:

1. `Alienation-Source.R`
 - This script
2. `Alienation-Descriptives.R`
